Makes your conservatory perfect

global conservatory roof
Designed without compromise
& tested to give you peace of mind

*Every Global conservatory roofing system carries a 25-year
BBA (British Board of Agrément) life expectancy certificate.*

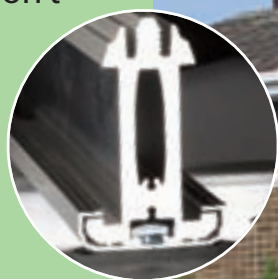

FINISHING TOUCHES

A great choice of finials and
cresting options to personalise
your conservatory

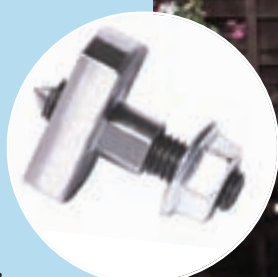

HIGH STRENGTH RAFTERS

Global rafter bars are designed
for heavy glass so you don't
have to compromise on
design or weather
performance.

TIE BOLT

Improves your living
space by removing up
to 60% of tie bars from
inside the conservatory.

VARIABLE VALLEY GUTTER

Fits the exact angle of the roof
to ensure a weather tight,
attractive gutter.

INSULATED BOX GUTTER

Our unique box gutter is twin skinned and
insulated to cut condensation.
A special fixing plate means
unlike other roofs no holes are
drilled in the gutter so no leaks.

NO HOLES THROUGH THE ROOF

We don't think it's a good idea to drill holes in something
that should be fully watertight. The unique internal fixing
bolts the roof together from the inside for higher
security. No screw holes means no leaks.

PERFECT LEAD FLASHING

The starter bar leaves a perfect
lead flashing line seamlessly
connecting house and
conservatory. The lead
dresses into a built in
soaker tray forming a
watertight seal and no lead is
dressed onto the roof
preventing unsightly staining.

ALUMINIUM WOODGRAIN TOP CAP

Woodgrain Global top
cappings are made from
aluminium so will not warp or
distort in the heat of the sun,
preventing slippage of the
glass or glazing sheets.

INTERNAL GASKET SYSTEM

No one wants to look at their
conservatory roof and see thick
black gaskets around every
glazing bar. That's why we
have designed the Global roof
with concealed gaskets.
